

# Clinton-Glen Gardner School District

## Curriculum Management System

---

Mathematics

Grade K

**\* For adoption by all regular education programs as specified and for adoption or adaptation by all Special Education Programs in accordance with Board of Education Policy #2200.**

Board Approved: November 18, 2020

## **CLINTON-GLEN GARDNER SCHOOL DISTRICT**

### **ADMINISTRATION**

Dr. Seth Cohen, Superintendent/Principal  
Mrs. Bernadette Wang, Business Administrator  
Mrs. Jacqueline Turner, Assistant Principal  
Dr. Jenine Kastner, Director of Special Services

### **BOARD OF EDUCATION**

Mr. Brendan McIsaac, President  
Mr. Craig Sowell, Vice President  
Mr. Carl Sabatino  
Mrs. Lorraine Linfante  
Dr. Ashutosh Tewari

## Acknowledgments

**21<sup>st</sup> Century Life and Careers Integration:** Jessica Latanzio Crespo  
Barbara Shaffer  
Kim Peterson  
Jacqueline Evans-Turner

# **Clinton-Glen Gardner School District**

## **Mission**

The Clinton-Glen Gardner School District, a community who values traditions, nurtures and cultivates each child to be a compassionate, curious, and creative thinker entrusted and empowered to build and lead the future.

## **Philosophy**

The economy in which graduates of our schools will seek employment is more competitive than ever and is rapidly changing in response to advances in technology. To compete in today's global, information-based economy, students must be able to solve real problems, reason effectively, and make logical connections. In this changing world those who have a good understanding of mathematics will have many opportunities and doors open to them throughout their lives. Today's workforce requires mathematical knowledge and skills in areas such as data analysis, problem-solving, pattern recognition, statistics and probability; therefore, our school's curriculum must prepare students for these expectations.

The Clinton-Glen Gardner School is committed to providing all students with the opportunity and the support necessary to learn significant mathematics with depth and understanding. To that end, students will engage in a wide variety of learning activities designed to develop their ability to reason and solve complex problems. Calculators, computers, manipulatives, technology, and the Internet will be used as tools to enhance learning and assist in problem solving. Group work, projects, literature, and interdisciplinary activities will make mathematics more meaningful and aid understanding. Classroom instruction will be designed to meet the learning needs of all children and will reflect a variety of learning styles.

The math curriculum fosters students who:

- Develop computational, conceptual, problem-solving and reasoning skills
- Demonstrate their understanding of mathematical concepts based on higher levels of mathematical thought
- Use technology and other tools as an integral part of solving mathematical problems

## New Jersey State Department of Education New Jersey Learning Standards

### **Intent and Spirit of the New Jersey Mathematics Learning Standards**

For more than a decade, research studies of mathematics education in high-performing countries have concluded that mathematics education in the United States must become substantially more focused and coherent in order to improve mathematics achievement in this country. To deliver on this promise, the mathematics standards are designed to address the problem of a curriculum that is "a mile wide and an inch deep."

The math standards provide **clarity and specificity** rather than broad general statements. The standards draw on the most important international models for **mathematical practice**, as well as research. They endeavor to follow the design envisioned by William Schmidt and Richard Houang (2002), by not only **stressing conceptual understanding** of key ideas, but also by continually returning to organizing principles (coherence) such as place value and the laws of arithmetic to structure those ideas.

In addition, the "sequence of topics and performances" that is outlined in a body of math standards must respect what is already known about how students learn. As Confrey (2007) points out, developing "sequenced obstacles and challenges for students...absent the insights about meaning that derive from careful study of learning, would be unfortunate and unwise." Therefore, the development of the standards began with research-based learning progressions detailing what is known today about how students' mathematical knowledge, skill, and understanding develop over time. The knowledge and skills students need to be prepared for mathematics in college, career, and life are woven throughout the mathematics standards.

### **A note about 21<sup>st</sup> Century Life and Careers Standards and Cumulative Progress Indicators.**

The New Jersey Core Curriculum Content Standards for 21<sup>st</sup> Century Life and Careers were revised in 2009. The Cumulative Progress Indicators (CPI's) referenced in this curriculum guide refer to these new standards. A complete copy of the new Core Curriculum Content Standards for 21<sup>st</sup> Century Life and Careers may be found at:

<http://www.state.nj.us/education/cccs/standards/9/>

## Mathematics: Standards for Mathematical Practice Interpreted for Kindergarten Through Second Grade

The Standards for Mathematical Practice describe varieties of expertise that mathematics educators at all levels should seek to develop in their students. These practices rest on important “processes and proficiencies” with long standing importance in mathematics education. The first of these are the NCTM process standards of problem solving, reasoning and proof, communication, representation and connections. The second are the strands of mathematical proficiency specified in the National Research Council’s report *Adding It Up*: adaptive reasoning, strategic competence, conceptual understanding (comprehension of mathematical concepts, operations and relations), procedural fluency (skill in carrying out procedures flexibly, accurately, efficiently and appropriately) and productive disposition (habitual inclination to see mathematics as sensible, useful and worthwhile, coupled with a belief in diligence and one’s own efficacy).

The Standards for Mathematical Practice are:

### 1. MAKE SENSE OF PROBLEMS AND PERSEVERE IN SOLVING THEM.

As you look at or read a mathematical problem, think about what it means and what it is asking you to do. Also think about what would be a good way to start solving it. Ask yourself:

- What does the problem tell me?
  - What information is given?
  - What are the relationships among parts of the problem?
  - What is the goal of solving the problem?
  - Have I seen other problems similar to this one?
- What does the problem ask me to find out (solve)?
- How should I start solving the problem?
- Can pictures or a drawing help me to figure out how to solve the problem?
- Does how I’m answering the problem make sense with what the problem is asking?
- What are some other ways to solve the problem?
- Can I use another way to check if my answer is correct?
- Does my answer make sense?

### 2. REASON ABSTRACTLY AND QUANTITATIVELY.

Understand the relationship of numbers and number problems and represent them using pictures, drawings or symbols. Talk about the parts of number problems using pictures, drawings or symbols as well as how the pictures, drawings or symbols represent and help explain the problem. Show how using different numbers or operations in the same problem changes it.

### 3. CONSTRUCT VIABLE ARGUMENTS AND CRITIQUE THE REASONING OF OTHERS.

Use objects, drawings, diagrams or actions to construct arguments about math problems with understanding and using appropriate vocabulary to explain the reasoning process. Build a local argument, communicate it with others, justify your reasoning process and respond to the reasoning process someone else uses. Express agreement if both arguments are correct and explain why an argument is flawed if it is.

**4. MODEL WITH MATHEMATICS.**

Apply mathematical skills to everyday life, society, the workplace and other situations; identify important quantities in practical situations; write an equation to describe a situation; revise solutions; use tools such as diagrams, two-way tables, graphs, flowcharts and formulas to show relationships; analyze relationships to draw conclusions, interpret results in context and reflect on whether the results make sense.

**5. USE APPROPRIATE TOOLS STRATEGICALLY.**

Identify and make decisions regarding which tool, such as paper and pencil, models, rulers, spreadsheets, etc., to use to help solve mathematical problems as well as know when a tool is not the right one to use. Use technological and other tools to deepen understanding.

**6. ATTEND TO PRECISION.**

Communicate precisely when discussing math incorporating the following:

- Use clear definitions.
- Choose, use and explain symbols correctly, consistently and appropriately.
- Specify units of measure and labels correctly.
- Avoid careless errors.
- Follow formulas to explain thinking to others.

**7. LOOK FOR AND MAKE USE OF STRUCTURE.**

Look for and identify structure and patterns in mathematics (for example, three and seven more is the same amount as seven and three more, or sort shapes according to their number of sides) and see if the pattern or structure changes.

**8. LOOK FOR AND EXPRESS REGULARITY IN REPEATED REASONING.**

Look for repetition in calculations and numeric thinking, such as skip counting. Pay attention to the whole problem and the details and continuously evaluate the accuracy and reasonableness of both intermediate and final answers.

## **CONNECTING THE STANDARDS FOR MATHEMATICAL PRACTICE TO THE STANDARDS FOR MATHEMATICS CONTENT**

The Standards for Mathematical Practice describe ways in which developing student practitioners of the discipline of mathematics increasingly ought to engage with the subject matter as they grow in mathematical maturity and expertise throughout the elementary, middle and high school years. Designers of curricula, assessments and professional development should all attend to the need to connect the mathematical practices to mathematical content in mathematical instruction. The Standards for Mathematical Content are a balanced combination of procedure and understanding. Expectations that begin with the word “understand” are often especially good opportunities to connect the practices to the content. Students who lack understanding of a topic may rely on procedures too heavily. Without a flexible base from which to work, they may be less likely to consider analogous problems, represent problems coherently, justify conclusions, apply the mathematics to practical situations, use technology mindfully to work with the mathematics, explain the mathematics accurately to other students, step back for an overview or deviate from a known procedure to find a shortcut. In short, a lack of understanding effectively prevents a student from engaging the mathematical practices. In this respect those content standards, which set an expectation of understanding are potential “points of intersection” between the Standards for Mathematical Content and the Standards for Mathematical Practice. These points of intersection are intended to be weighted toward central and generative concepts in the school mathematics curriculum that most merit time, resources, innovative energies and focus necessary to qualitatively improve the curriculum, instruction, assessment, professional development and student achievement in mathematics.

The Standards for Mathematical Practice stated below are to be developed with students, used by students when teaching the mathematical content here within and integrated into each of the following units.

### **New Jersey Student Learning Standards for Mathematical Practice**

1. Make sense of problems and persevere in solving them.
2. Reason abstractly and quantitatively.
3. Construct viable arguments and critique the reasoning of others.
4. Model with mathematics.
5. Use appropriate tools strategically.
6. Attend to precision.
7. Look for and make use of structure.
8. Look for and express regularity in repeated reasoning.

**Kindergarten  
Mathematics  
Scope and Sequence**

**Trimester I September through December  
(approximately 60 days)**

On-going 21<sup>st</sup> Century Skills and Themes: Problem Solving, Collaboration, Creativity, and Innovation

**Topic: Counting and Cardinality**

- I. Number Sense
  - a. Count by 1s from any given number
  - b. Skip counting
  - c. Identify and write numerals 1-20
  - d. Value of penny and dime
  - e. Value of paper money
  - f. Number patterns
  - g. One-to-one correspondence
- II. Number Comparisons

**Topic: Operations and Algebraic Thinking**

- III. Numerical Operations
  - a. Changing numbers (bigger/adding and smaller/subtracting)
  - b. Addition
  - c. Compliments of ten
  - d. Subtraction
  - e. Solving equations

**Standards**

**MA.K.CC.A.3**

Write numbers from 0 to 20. Represent a number of objects with a written numeral 0-20 with 0 representing a count of no objects).

**MA.K.CC.B.4a**

When counting objects, say the number names in the standard order, pairing each object with one and only one number name and each number name with one and only one object.

**MA.K.CC.B.4b**

Understand that the last number name said tells the number of objects counted. The number of objects is the same regardless of their arrangement or the order in which they were counted.

**MA.K.CC.B.4c**

Understand that each successive number name refers to a quantity that is one larger.

**MA.K.CC.B.5**

Count to answer “how many?” questions about as many as 20 things arranged in a line, a rectangular array, or a circle, or as many as 10 things in a scattered configuration; given a number from 1–20, count out that many objects.

**MA.K.OA.A.4**

For any number from 1 to 9, find the number that makes 10 when added to the given number, e.g., by using objects or drawings, and record the answer with a drawing or equation.

**MA.K.OA.A.5** Demonstrate fluency for addition and subtraction within 5.

**MA.K.OA.A.1** Represent addition and subtraction up to 10 with objects, fingers, mental images, drawings, sounds (e.g., claps), acting out situations, verbal explanations, expressions, or equations.

**MA.K.OA.A.2**

Solve addition and subtraction word problems, and add and subtract within 10, e.g., by using objects or drawings to represent the problem.

**MA.K.CC.C.6**

Identify whether the number of objects in one group is greater than, less than, or equal to the number of objects in another group, e.g., by using matching and counting strategies.

**MA.K.CC.C.7**

Compare two numbers between 1 and 10 presented as written numerals.

**MA.K.CC.A.1**

Count to 100 by ones and by tens.

**MA.K.CC.A.2**

Count forward beginning from a given number within the known sequence (instead of having to begin at 1).

**MA.K.CC.A.3**

Write numbers from 0 to 20. Represent a number of objects with a written numeral 0-20 (with 0 representing a count of no objects).

**MA.K.CC.C.6**

Identify whether the number of objects in one group is greater than, less than, or equal to the number of objects in another group, e.g., by using matching and counting strategies.

**ELA ANCHOR STANDARDS**

**Craft and Structure**

NJSLSA.R4. Interpret words and phrases as they are used in a text, including determining technical, connotative, and figurative meanings, and analyze how specific word choices shape meaning or tone.

NJSLSA.R5. Analyze the structure of texts, including how specific sentences, paragraphs, and larger portions of the text (e.g., a section, chapter, scene, or stanza) relate to each other and the whole.

NJSLSA.W1. Write arguments to support claims in an analysis of substantive topics or texts, using valid reasoning and relevant and sufficient evidence.

NJSLSA.W2. Write informative/explanatory texts to examine and convey complex ideas and information clearly and accurately through the effective selection, organization, and analysis of content.

### **Research to Build and Present Knowledge**

NJSLSA.W7. Conduct short as well as more sustained research projects, utilizing an inquiry-based research process, based on focused questions, demonstrating understanding of the subject under investigation.

NJSLSA.W8. Gather relevant information from multiple print and digital sources, assess the credibility and accuracy of each source, and integrate the information while avoiding plagiarism.

NJSLSA.W9. Draw evidence from literary or informational texts to support analysis, reflection, and research.

### **Range of Writing**

NJSLSA.W10. Write routinely over extended time frames (time for research, reflection, and revision) and shorter time frames (a single sitting or a day or two) for a range of tasks, purposes, and audiences.

## **Differentiation/Accommodations/Modifications**

**Special Education:** Read and follow IEP/504. Meet with CST case manager if additional guidance is needed.

**For Gifted:** Encourage risk taking in creating their projects as opportunities to stretch skills during production. Actively assess to identify student interests, learning preferences and the ability to work independently.

**At Risk:** Review specific accommodations for individual students in RTI folder. If accommodations are not working, schedule meeting with RTI case manager to discuss and refine/update strategies or refer student to RTI Committee

**ELL:** Meet with Mrs. Olczak to discuss specific accommodations based on student progress and placement on WIDA testing.

**\*Please review appendix for extensive list of strategies for each subgroup.**

## **Assessment**

**District Benchmark:** Link It

**Formative Assessment:** Discussion, Teacher observation during Rote Counting, Teacher observation during Center work and small group partner work, review of homework

**Summative Assessment:** End of Chapter Go Math quiz, Responses to Open-Ended Questions

**Alternative Assessment:** PBA based on student interest

**During Work Period adjust lessons for individual students and small groups of students based on formative and summative data (Go back and re-teach for those that did not meet standard on benchmark and plan accordingly for those that exceeded benchmark)**

## **Core instructional and Supplemental Materials**

Go Math Student and Teacher Textbook, Go Math on-line resources, Go Math Workbooks, Go Math Manipulatives, Go Math Videos

Go Math Supplemental Materials (charts, dice, geometric shapes, counting beads, rulers, etc.)

Leveled Classroom library with various mathematical topics

### **Interdisciplinary Connections**

#### **LA.SL.K.1**

Participate in collaborative conversations with diverse partners about kindergarten topics and texts with peers and adults in small and larger groups.

#### **LA.SL.K.1.A**

Follow agreed-upon norms for discussions (e.g., listening to others with care and taking turns speaking about the topics and texts under discussion).

#### **LA.SL.K.2**

Confirm understanding of a text read aloud or information presented orally or through other media by asking and answering questions about key details and requesting clarification if something is not understood.

#### **LA.SL.K.3**

Ask and answer questions in order to seek help, get information, or clarify something that is not understood.

### **21<sup>st</sup> Century Skills (The ones that apply for this unit are in bold)**

1. Creativity & Innovation
2. **Critical Thinking & Problem Solving**
3. **Communication & Collaboration**
4. Media Literacy
5. Information Literacy
6. Information, Communication & Technology

### **21<sup>st</sup> Century Themes (The ones that apply for this unit are in bold)**

1. Global Awareness
2. Financial, Economic, Business and Entrepreneurial Literacy
3. **Civic Literacy**
4. Health Literacy
5. Environmental Literacy

### **Career Ready Practices and Career Education & Career Exploration**

CRP1. Act as a responsible and contributing citizen and employee.

CRP2. Apply appropriate academic and technical skills.

CRP5. Consider the environmental, social and economic impacts of decisions.

9.2.4.A.1 Identify reasons why people work, different types of work, and how work can help a person achieve personal and professional goals.

9.2.4.A.2 Identify various life roles and civic and work-related activities in the school, home, and community.

9.2.4.A.3 Investigate both traditional and nontraditional careers and relate information to personal likes and dislikes.

9.2.4.A.4 Explain why knowledge and skills acquired in the elementary grades lay the foundation for future academic and career success.

**Exploration:** During this trimester students are able to roleplay different careers through pretend play such as being a teacher, fireman, or policeman. Students listen to read alouds that describe aspects of different careers such as *Officer Buckle*. Students take turns having different classroom “jobs” such as line leader, lunch counter, timekeeper, materials distributor, publisher, editor, and weatherman for which they have specific duties and must take responsibility.

### **Technology**

#### **TECH.8.1.2.A.4**

Demonstrate developmentally appropriate navigation skills in virtual environments (i.e., games, museums).

#### **TECH.8.1.2.A.2**

Create a document using a word processing application.

#### **TECH.8.1.2.A.1**

Identify the basic features of a digital device and explain its purpose.

### **Technology Infusion: Students are able to understand and use technology systems**

Internet, Web Quests, content-related websites, wireless laptop computers, computer laboratory, classroom computers, and daily interaction with SMART Boards, CDs, DVDs, webinars, video streaming, and podcasting. Utilize programs on the iPad. Watch and interact with letter sound videos.

Observe and engage with SchoolTube videos. Use of books on tape and listening center. Use of Shutterfly, Share Site. Creation and publication of class created books.

## Trimester II December through March (Approximately 60 days)

On-going 21<sup>st</sup> Century Skills and Themes: Problem Solving, Collaboration, Creativity, and Innovation

### Topic: Number and Operations in Base Ten

#### IV. Place Value

- a. Compose double digit numbers
- b. Decompose double digit numbers

### Topic: Measurement and Data

#### V. Measurement

- a. Length
- b. Weight
- c. Volume/capacity
- d. Time to the hour
- e. Tally marks
- f. Season, month, day

#### VI. Data

- a. Classify items by attribute
- b. Compare items by attribute
- c. Graphs to represent data

### Standards

#### **MA.K.OA.A.1**

Represent addition and subtraction up to 10 with objects, fingers, mental images, drawings, sounds (e.g., claps), acting out situations, verbal explanations, expressions, or equations.

#### **MA.K.OA.A.2**

Solve addition and subtraction word problems, and add and subtract within 10, e.g., by using objects or drawings to represent the problem.

#### **MA.K.OA.A.3**

Decompose numbers less than or equal to 10 into pairs in more than one way, e.g., by using objects or drawings, and record each decomposition by a drawing or equation (e.g.,  $5 = 2 + 3$  and  $5 = 4 + 1$ ).

#### **MA.K.NBT.A.1**

Compose and decompose numbers from 11 to 19 into ten ones and some further ones, e.g., by using objects or drawings, and record each composition or decomposition by a drawing or equation (e.g.,  $18 = 10 + 8$ ); understand that these numbers are composed of ten ones and one, two, three, four, five, six, seven, eight, or nine ones.

#### **MA.K.MD.A.2**

Directly compare two objects with a measurable attribute in common, to see which object has “more of”/“less of” the attribute, and describe the difference.

#### **MA.K.MD.A.1**

Describe measurable attributes of objects, such as length or weight. Describe several measurable attributes of a single object.

#### **MA.K.MD.B.3**

Classify objects into given categories; count the numbers of objects in each category and sort the categories by count.

## **ELA ANCHOR STANDARDS**

### **Craft and Structure**

NJSLSA.R4. Interpret words and phrases as they are used in a text, including determining technical, connotative, and figurative meanings, and analyze how specific word choices shape meaning or tone.

NJSLSA.R5. Analyze the structure of texts, including how specific sentences, paragraphs, and larger portions of the text (e.g., a section, chapter, scene, or stanza) relate to each other and the whole.

NJSLSA.W1. Write arguments to support claims in an analysis of substantive topics or texts, using valid reasoning and relevant and sufficient evidence.

NJSLSA.W2. Write informative/explanatory texts to examine and convey complex ideas and information clearly and accurately through the effective selection, organization, and analysis of content

### **Research to Build and Present Knowledge**

NJSLSA.W7. Conduct short as well as more sustained research projects, utilizing an inquiry-based research process, based on focused questions, demonstrating understanding of the subject under investigation.

NJSLSA.W8. Gather relevant information from multiple print and digital sources, assess the credibility and accuracy of each source, and integrate the information while avoiding plagiarism.

NJSLSA.W9. Draw evidence from literary or informational texts to support analysis, reflection, and research.

### **Range of Writing**

NJSLSA.W10. Write routinely over extended time frames (time for research, reflection, and revision) and shorter time frames (a single sitting or a day or two) for a range of tasks, purposes, and audiences.

## **Differentiation/Accommodations/Modifications**

**Special Education:** Read and follow IEP/504. Meet with CST case manager if additional guidance is needed.

**For Gifted:** Encourage risk taking in creating their projects as opportunities to stretch skills during production. Actively assess to identify student interests, learning preferences and the ability to work independently.

**District Benchmark:** Link It

**Formative Assessment:** Discussion, Teacher observation during Rote Counting, Teacher observation during Center work and small group partner work, review of homework

**Summative Assessment:** End of Chapter Go Math quiz, Responses to Open-Ended Questions

**Alternative Assessment:** PBA based on student interest

**During Work Period adjust lessons for individual students and small groups of students based on formative and summative data (Go back and re-teach for those that did not meet standard on benchmark and plan accordingly for those that exceeded benchmark)**

## Core instructional and Supplemental Materials

Go Math Student and Teacher Textbook, Go Math on-line resources, Go Math Workbooks, Go Math Manipulatives, Go Math Videos

Go Math Supplemental Materials (charts, dice, geometric shapes, counting beads, rulers, etc.)

Leveled Classroom library with various mathematical topics

## Interdisciplinary Connections

**LA.RF.K.1** Demonstrate understanding of the organization and basic features of print.

**LA.RF.K.2** Demonstrate understanding of spoken words, syllables, and sounds (phonemes).

**LA.RI.K.1** With prompting and support, ask and answer questions about key details in a text.

**LA.RF.K.3** Know and apply grade-level phonics and word analysis skills in decoding and encoding words.

**LA.RI.K.2** With prompting and support, identify the main topic and retell key details of a text.

**LA.RI.K.3** With prompting and support, describe the connection between two individuals, events, ideas, or pieces of information in a text.

**LA.RI.K.4** With prompting and support, ask and answer questions about unknown words in a text.

**LA.RI.K.7** With prompting and support, describe the relationship between illustrations and the text in which they appear (e.g., what person, place, thing, or idea in the text an illustration depicts).

**LA.RI.K.10** Actively engage in group reading activities with purpose and understanding.

### **21<sup>st</sup> Century Skills (The ones that apply for this unit are in bold)**

- **Creativity & Innovation**
- **Critical Thinking & Problem Solving**
- **Communication & Collaboration**
- Media Literacy
- Information Literacy
- **Information, Communication & Technology**

### **21<sup>st</sup> Century Themes (The ones that apply for this unit are in bold)**

- **Global Awareness**
- **Financial, Economic, Business and Entrepreneurial Literacy**
- Civic Literacy
- **Health Literacy**
- Environmental Literacy

### **Career Ready Practices and Career Education & Career Exploration**

CRP1. Act as a responsible and contributing citizen and employee.

CRP2. Apply appropriate academic and technical skills.

CRP5. Consider the environmental, social and economic impacts of decisions.

9.2.4.A.1 Identify reasons why people work, different types of work, and how work can help a person achieve personal and professional goals.

9.2.4.A.2 Identify various life roles and civic and work-related activities in the school, home, and community.

9.2.4.A.3 Investigate both traditional and nontraditional careers and relate information to personal likes and dislikes.

9.2.4.A.4 Explain why knowledge and skills acquired in the elementary grades lay the foundation for future academic and career success.

**Exploration:** During this trimester students are able to role-play different careers through pretend play such as being a teacher, fireman, or policeman. Students listen to read-alouds that describe aspects of different careers such as *Officer Buckle*. Students take turns having different classroom “jobs” such as line leader, lunch counter, timekeeper, materials distributor, publisher, editor, and weatherman for which they have specific duties and must take responsibility.

### **Technology**

#### **TECH.8.1.2.A.4**

Demonstrate developmentally appropriate navigation skills in virtual environments (i.e., games, museums).

#### **TECH.8.1.2.A.2**

Create a document using a word processing application.

#### **TECH.8.1.2.A.1**

Identify the basic features of a digital device and explain its purpose.

### **Technology Infusion: Students are able to understand and use technology systems**

Internet, Web Quests, content-related websites, wireless laptop computers, computer laboratory, classroom computers, and daily interaction with SMART Boards, CDs, DVDs, webinars, video streaming, and podcasting, Utilize programs on the iPad. Watch and interact with letter sound videos.

Observe and engage with SchoolTube videos. Use of books on tape and listening center. Use of Shutterfly, Share Site. Creation and publication of class created books.

**Trimester III March through June  
(approximately 60 days)**

On-going 21<sup>st</sup> Century Skills and Themes: Problem Solving, Collaboration, Creativity, and Innovation

**Topic: Measurement and Data (continued)**

- VII. Measurement
  - g. Length
  - h. Weight
  - i. Volume/capacity
  - j. Time to the hour
  - k. Tally marks
  - l. Season, month, day

VIII. Data

- d. Classify items by attribute
  - e. Compare items by attribute
- Graphs to represent data

**Topic: Geometry**

- IX. Geometry
  - a. Positional words
  - b. Two and three dimensional shapes
    - i. Identification
    - ii. Comparison
    - iii. Composition and decomposition Symmetry

**Standards**

**MA.K.NBT.A.1**

Compose and decompose numbers from 11 to 19 into ten ones and some further ones, e.g., by using objects or drawings, and record each composition or decomposition by a drawing or equation (e.g.,  $18 = 10 + 8$ ); understand that these numbers are composed of ten ones and one, two, three, four, five, six, seven, eight, or nine ones.

**MA.K.G.A.1**

Describe objects in the environment using names of shapes, and describe the relative positions of these objects using terms such as above, below, beside, in front of, behind, and next to.

**MA.K.G.B.4**

Analyze and compare two- and three-dimensional shapes, in different sizes and orientations, using informal language to describe their similarities, differences, parts (e.g., number of sides and vertices/“corners”) and other attributes (e.g., having sides of equal length).

**MA.K.G.A.2**

Correctly name shapes regardless of their orientations or overall size.

**MA.K.G.A.3**

Identify shapes as two-dimensional (lying in a plane, “flat”) or three-dimensional (“solid”).

Model shapes in the world by building shapes from components (e.g., sticks and clay balls) and drawing shapes.

**MA.K.G.B.6**

Compose simple shapes to form larger shapes

## Differentiation/Accommodations/Modifications

**Special Education:** Read and follow IEP/504. Meet with CST case manager if additional guidance is needed.

**For Gifted:** Encourage risk taking in creating their projects as opportunities to stretch skills during production. Actively assess to identify student interests, learning preferences and the ability to work independently.

**At Risk:** Review specific accommodations for individual students in RTI folder. If accommodations are not working, schedule meeting with RTI case manager to discuss and refine/update strategies or refer student to RTI Committee

**ELL:** Meet with Mrs. Olczak to discuss specific accommodations based on student progress and placement on WIDA testing.

**\*Please review appendix for extensive list of strategies for each subgroup.**

**Summative Assessment:** End of Chapter Go Math quiz, Responses to Open-Ended Questions

**Alternative Assessment:** PBA based on student interest

**During Work Period adjust lessons for individual students and small groups of students based on formative and summative data (Go back and re-teach for those that did not meet standard on benchmark and plan accordingly for those that exceeded benchmark)**

## Core instructional and Supplemental Materials

Go Math Student and Teacher Textbook, Go Math on-line resources, Go Math Workbooks, Go Math Manipulatives, Go Math Videos

Go Math Supplemental Materials (charts, dice, geometric shapes, counting beads, rulers, etc.)

Leveled Classroom library with various mathematical topics

## Interdisciplinary Connections

### ELA ANCHOR STANDARDS

#### Craft and Structure

NJSLSA.R4. Interpret words and phrases as they are used in a text, including determining technical, connotative, and figurative meanings, and analyze how specific word choices shape meaning or tone.

NJSLSA.R5. Analyze the structure of texts, including how specific sentences, paragraphs, and larger portions of the text (e.g., a section, chapter, scene, or stanza) relate to each other and the whole.

NJSLSA.W1. Write arguments to support claims in an analysis of substantive topics or texts, using valid reasoning and relevant and sufficient evidence.

NJSLSA.W2. Write informative/explanatory texts to examine and convey complex ideas and information clearly and accurately through the effective selection, organization, and analysis of content.

### **Research to Build and Present Knowledge**

NJSLSA.W7. Conduct short as well as more sustained research projects, utilizing an inquiry-based research process, based on focused questions, demonstrating understanding of the subject under investigation.

NJSLSA.W8. Gather relevant information from multiple print and digital sources, assess the credibility and accuracy of each source, and integrate the information while avoiding plagiarism.

NJSLSA.W9. Draw evidence from literary or informational texts to support analysis, reflection, and research.

### **Range of Writing**

NJSLSA.W10. Write routinely over extended time frames (time for research, reflection, and revision) and shorter time frames (a single sitting or a day or two) for a range of tasks, purposes, and audiences.

### **21<sup>st</sup> Century Skills (The ones that apply for this unit are in bold)**

- **Creativity & Innovation**
- **Critical Thinking & Problem Solving**
- Communication & Collaboration
- **Media Literacy**
- **Information Literacy**
- **Information, Communication & Technology**

### **21<sup>st</sup> Century Themes (The ones that apply for this unit are in bold)**

- Global Awareness
- **Financial, Economic, Business and Entrepreneurial Literacy**
- Civic Literacy
- **Health Literacy**
- **Environmental Literacy**

### **Career Ready Practices and Career Education & Career Exploration**

CRP.K-12.CRP2 Apply appropriate academic and technical skills.

CRP.K-12.CRP5 Consider the environmental, social and economic impacts of decisions.

CRP.K-12.CRP4 Communicate clearly and effectively and with reason.

CRP.K-12.CRP11 Use technology to enhance productivity.

CRP.K-12.CRP8 Utilize critical thinking to make sense of problems and persevere in solving them.

CRP.K-12.CRP1 Act as a responsible and contributing citizen and employee.

CRP.K-12.CRP6 Demonstrate creativity and innovation.

CRP.K-12.CRP12 Work productively in teams while using cultural global competence.

9.2.4.A.1 Identify reasons why people work, different types of work, and how work can help a person achieve personal and professional goals.

9.2.4.A.2 Identify various life roles and civic and work-related activities in the school, home, and community.

9.2.4.A.3 Investigate both traditional and nontraditional careers and relate information to personal likes and dislikes.

9.2.4.A.4 Explain why knowledge and skills acquired in the elementary grades lay the foundation for future academic and career success.

**Exploration:** During this trimester students are able to role-play different careers through pretend play such as being a teacher, fireman, or policeman. Students listen to read-alouds that describe aspects of different careers such as *Officer Buckle*. Students take turns having different classroom “jobs” such as line leader, lunch counter, timekeeper, materials distributor, publisher, editor, and weatherman for which they have specific duties and must take responsibility.

### Technology

**TECH.8.1.2.A.4**

Demonstrate developmentally appropriate navigation skills in virtual environments (i.e., games, museums).

**TECH.8.1.2.A.2**

Create a document using a word processing application.

**TECH.8.1.2.A.1**

Identify the basic features of a digital device and explain its purpose.

### Technology Infusion: Students are able to understand and use technology systems

Internet, Web Quests, content-related websites, wireless laptop computers, computer laboratory, classroom computers, and daily interaction with SMART Boards, CDs, DVDs, webinars, video streaming, and podcasting, Utilize programs on the iPad. Watch and interact with letter sound videos.

Observe and engage with SchoolTube videos. Use of books on tape and listening center. Use of Shutterfly, Share Site. Creation and publication of class created books.

Suggested days of Instruction	Curriculum Management System <u>Subject/Grade Level:</u> <b>Kindergarten Mathematics</b>	<b>Topic: Number Sense</b>	
		<b>Goal 1:</b> The student will be able to develop a sense of what numbers are and how they work.	
	<b>Objectives / Cluster Concepts / Cumulative Progress Indicators (CPI's)</b> <b>The student will be able to:</b>	<b>Essential Questions, Conceptual Understandings</b>	<b>Instructional Tools / Materials / Technology / Resources / Learning Activities / Interdisciplinary Activities / Assessment Model</b>
On-going	<p>1.1. Count by 1s from any given number to 100. (K.CC.1, K.CC.2)</p> <p>1.2. Count by 5s and 10s to 100. (K.CC.1)</p> <p>1.3. Identify numbers 1-20. (K.CC.3, K.CC.4)</p> <p>1.4. Write the numerals 1-20. (K.CC.3)</p> <p>1.5. Count out a given number of objects displaying one-to-one correspondence. (K.CC.4, K.CC.5)</p> <p>1.6. Identify a penny and its value.</p> <p>1.7. Identify a dime and its value.</p> <p>1.8. Identify the difference between a dollar bill and coin.</p>	<p><b>Essential Questions:</b> What do the names of numbers mean? Why do we count? How can we accurately count and keep track of quantities up to 20 using money or other manipulatives? Why do we need to know the value of money? How do patterns help us describe and understand the order of numbers?</p> <p><b>Conceptual Understandings:</b> Numerals represent numbers and have many uses.  Number names describe the number of objects.  The last number counted in a sequence represents the number of objectives in a set.  Forming numbers correctly is useful in representing the quantity counted. A penny has the value of 1 cent.  A dime has the value of 10 cents. The value of a dime is equivalent to 10 pennies.</p>	<p><b>Learning Activities:</b> Calendar Activities: calendar, 100's chart/100 number line As children complete calendar activities, ask them to tell you a pattern they notice about the numbers in the 100's chart. Morning Activities: counting-up while passing an item Center Activities Counting games: "Sit on...", counting in line, Top It Skill sheets <b>Assessment Models:</b> District Go Math benchmark Rote Counting: How far you count? (Child counts as far as he or she can go) *When reassessing at various times of the year (quarterly), have students begin counting from a given number instead of beginning with the number 1.  Numeral Recognition: Place numeral cards in random order. (Can you tell me the names of any of these numbers) – If child is reluctant can try "Show me a" (name of the numeral) or "What is" (Make note if wording makes a difference).  Numeral Writing: 1. Students write numbers in sequence (1-20) 2. Students write numeral dictated</p>

<b>Suggested days of Instruction</b>	<b>Curriculum Management System</b> <u>Subject/Grade Level:</u> <b>Kindergarten</b> <b>Mathematics</b>	<b>Topic: Number Sense</b>	
		<u>Goal 1:</u> The student will be able to develop a sense of what numbers are and how they work.	
	<b>Objectives / Cluster Concepts / Cumulative Progress Indicators (CPI's)</b> <b>The student will be able to:</b>	<b>Essential Questions, Conceptual Understandings</b>	<b>Instructional Tools / Materials / Technology / Resources / Learning Activities / Interdisciplinary Activities / Assessment Model</b>
	1.9. Identify a 1, 5, 10 and 20 dollar bill.  1.10. Identify number patterns using a number chart (counting by 5s/10s and identifying numbers of similarity using the one's place). (K.CC.1)  1.11. Relate a numeral to a position of order (ordinal numbers - first, second, etc.). (K.CC.4)  1.12. Apply critical thinking and problem-solving skills in classroom and family settings. (9.1.4.A.5)  1.13. Practice collaborative skills in groups, and explain how these skills assist in completing tasks in different settings (at home, in school, and during play). (9.1.4.C.1)  1.14. Express needs, wants, and	A pattern has a predictable, repeating part, the core, and can be extended by using the repetitions of the core.	by teacher.  One to One Correspondence: Put out three groups of beans: a group of 8, a group of 12 and a group of 20. (Count a group of beans for me.) a. Line b. Rectangular array or circle c. Scattered configuration  Using receptive and expressive language, students will identify the names and values of the coins: penny and dime. (Students will be asked to point to the penny and point to the dime. Students will be asked to name the penny and name the dime and their values).  Using receptive and expressive language, students will identify the names and values of the bills: 1\$, 5\$, 10\$, 20\$. (Students will be asked to point to the bills: 1\$, 5\$, 10\$, and 20\$. Students will be asked to name the bills: 1\$, 5\$, 10\$, and 20\$ and their values.  <b>Additional Resources:</b>

<b>Suggested days of Instruction</b>	<b>Curriculum Management System</b>	<b>Topic: Number Sense</b>
