Mission

The mission of Clinton Public School is to inspire our students to become contributing members of society who are independent, innovative, life-time learners equipped with the necessary skills to meet the demands of our ever-changing world.

Philosophy

Experience with and knowledge of the arts is an essential component of student learning in the 21st century. As we meet the needs of a changing world and the 21st century workforce, capitalizing on the unique ability of the arts to unleash creativity and innovation in our students is critical for success. The arts enable personal, intellectual, social, economic, and human growth by fostering creativity and providing opportunities for expression beyond the limits of language. Equitable access to arts instruction is achieved when students have regular experiences in each of the four arts disciplines (dance, music, theatre, and visual art). Thus, the goal of the visual art program is to contribute to students' regular, sequential arts instruction.

As with any language, artistic literacy provides the tools necessary to express one's self. The visual arts curriculum provides the tools with which students can become artistically literate and fosters students who:

- Create, reshape, and fully participate in the enhancement of the quality of life, globally
- Participate in social, cultural, and intellectual interplay among people of different ethnic, racial, and cultural backgrounds
- Possess essential technical skills and abilities significant to many aspects of life and work in the 21st century
- Understand and impact the increasingly complex technological environment.
