

Important Scheduling Changes 2017-2018

- **The North Hunterdon-Voorhees District will be implementing a Rolling Drop Block Schedule**
 - See page 2 for more information.
 - Students will schedule 4 morning classes and 4 afternoon classes.
 - During the split lunch, half the student body will be in directed study classes and the other half will be in lunch.
 - They will then switch for the other lunch period.
 - All students will eat lunch in the period they do not have their science lab.
- **All 9th grade students will be taking Biology**
 - The new course sequence will be biology, chemistry and physics.
 - AP science classes will require students to complete the first level of the course prior to taking the AP course.
 - The new typical AP science sequence could look like this:
 - 9th Grade: Honors Biology
 - 10th Grade: Honors Chemistry and AP Biology
 - 11th Grade: Honors Physics and AP Chemistry
 - 12th Grade: AP Physics and another science elective
- **Students will have two options for CDL**
 - Communication and Digital Literacy through the Humanities #216
 - Communication and Digital Literacy through Science and Engineering #499
- **All science classes will be 6 credits**
 - All science classes will include an additional lab period which will meet for 24 minutes over the lunch period when their science class is just prior to or just after the lunch period.
 - If students have a morning science class, they will have the science lab during the first lunch period and they will eat each day in the second lunch period.
 - If students have an afternoon science class, they will have the science lab during the second lunch period and they will eat each day in the first lunch period.
